

**Number of Chronic Hospital Beds and Patient Days
and Percent Occupancy, by Facility: Maryland, 2007**

Jurisdiction/Facility	Number of Beds	Number of Days	Occupancy (%)
Baltimore City			
<i>James Lawrence Kernan Hospital</i> ¹	40	17,879	122.5%
<i>Johns Hopkins Bayview Medical Center</i> ²	69	24,266	96.4%
<i>Levindale Hebrew Geriatric Center and Hospital</i>	100	40,304	110.4%
<i>University Specialty Hospital</i>	180	52,674	80.2%
Prince George's County			
<i>Gladys Spellman Specialty Hospital and Nursing Center</i>	52	15,863	83.6%
SUBTOTAL: Private Chronic Hospitals	441	150,986	93.8%
Washington County			
<i>Western Maryland Hospital Center</i> ³	60	9,681	44.2%
Wicomico County			
<i>Deer's Head Hospital Center</i> ⁴	66	4,604	19.1%
SUBTOTAL: State-operated Chronic Hospitals ⁵	126	14,285	31.1%
STATEWIDE TOTAL ⁶	567	165,271	79.9%

Sources: Maryland Health Care Commission. The number of licensed chronic hospital beds maintained in the Commission's inventory is based on the Commission's Certificate of Need files and licensing information provided by the Office of Health Care Quality. The number of FY 2007 patient days for the private chronic hospitals is obtained from the Financial Data Base, as reported by private chronic hospitals to the Health Services Cost Review Commission (HSCRC), as of November 14, 2008. The number of FY 2007 patient days for the two state-operated chronic hospitals is obtained from the Hospital Management Information System (HMIS), as maintained by the Maryland Department of Health and Mental Hygiene.

Notes: The number of beds reflects the number of licensed chronic hospital beds at each facility as of June 30, 2007 (the end of the 2007 fiscal year reporting period). Occupancy is calculated based on licensed beds. For the two facilities with over 100 percent chronic hospital occupancy, patient days reflect that chronic hospital patients may be placed in other types of licensed beds within their facilities.

¹ Kernan Hospital's 40 chronic hospital beds include 16 dually licensed chronic/rehabilitation beds.

² Johns Hopkins Bayview Medical Center's 24,266 patient days is the combined number of patient days for the separately licensed 69 chronic hospital beds and six comprehensive inpatient rehabilitation (CIR) beds. Chronic hospital occupancy is calculated based on the 69 licensed chronic hospital beds.

³ Western Maryland Hospital Center's occupancy, based on its 34 *budgeted* chronic hospital beds, would be 78.0 percent.

⁴ Deer's Head Center's chronic hospital occupancy, based on its 16 *budgeted* chronic hospital beds, would be 78.8 percent.

⁵ The occupancy for the two State-operated chronic hospitals, based on the total 50 *budgeted* chronic hospital beds, would be 78.3 percent.

⁶ The statewide chronic hospital occupancy based on the 441 *licensed* beds at the five *private* facilities plus the 50 *budgeted* beds at the two *state-operated* facilities would be 92.2 percent.
